WHY SELECT DATEX AS YOUR HARDWARE SOLUTIONS PROVIDER?

Datex can help your business save time, money, downtime and frustration

The latest technology at the lowest prices

Additional Manufacturer Discounts. Datex passes along additional manufacturer discounts to ensure that you always get the lowest price on hardware. As a premium industry partner, Datex is often able to get special discounts that can be passed along to your company.

HELPS ENSURE STREAMLINED DATEX SOFTWARE IMPLEMENTATIONS

- **Free configuration with purchase of hardware from Datex**

- **Benefit from our experience.** Our team has specialized expertise in selecting, configuring, and troubleshooting mobile computing and other hardware solutions to work with Datex software.

- **Save time, money, and frustration.** With only one vendor to call, there is no "blame game" or "finger pointing". Datex experts handle all your needs to help keep your project on schedule and executed to the highest standards.

- **Optimizing wireless coverage.** Datex designs customized site surveys for optimal wireless coverage.

HELPS KEEP YOUR BUSINESS UP AND RUNNING USING THE LATEST TECHNOLOGY

- **Buyback program.** Take advantage of our device buyback program to help ensure that you always get the top dollar for used equipment when upgrading to the latest technology for your business.

- **MDM.** What is MDM? Datex mobile device management services can help reduce downtime and maximize workforce productivity. Datex remotely monitors, troubleshoots, tracks, upgrades, and provides a suite of sservives for your mobile devicesto help keep your business up and running at all times. We even monitor your battery and power consumption. See how your mobile devices are performing by reviewing your online dashboard or examining one of the various reports that our team can provide.

MEET OUR SERVICE TEAM

HELPS KEEP YOUR BUSINESS UP AND RUNNING USING THE LATEST TECHNOLOGY

- **Optimal, affordable solutions.** In business since 1978, Datex provides technology experts that can help find the best, cost effective solutions for your operation.

- **Latest technology.** Technology experts help ensure that you are advised of new technology advances and services that can benefit your business.

- **Highly experienced.** The Datex team includes experts with more than 15 years of service and experience in providing mobility hardware solutions to a variety of industries.

- **Top industry partnerships.** Take advantage of the long term partnerships Datex has established with industry leaders. Our experts keep up to date continually on industry solutions in order to advise you on the best technology for your business.

KIM GANOE, SENIOR SOLUTIONS CONSULTANT

With over 27 years of service at Datex as a Solutions Consultant, Kim has demonstrated her expertise by providing Warehouse Management and mobile computing solutions to the Supply Chain Industries to streamline their operations. Being certified with vendors such as Zebra, our customers are confident that she understands their needs and provides cost-effective solutions.

FIVE REASONS WHY RUGGED ENTERPRISE-GRADE TABLETS ARE DELIVERING A STRONGER RETURN ON INVESTMENT RIGHT NOW

Though it may be tempting to let your workers use consumer-grade tablets, laptops or 2-in-1s in the field, warehouse, store or factory, there is more risk than potential rewards in doing so. This is why.

As consumer demand increases and the needs of today's businesses change, enterprises are finding their workers need more screens to get their jobs done accurately and efficiently – in part because they are on the move more than ever. Though handheld mobile computing devices have long been a staple for front-line workers, many companies now need to bring the value of a desktop computer out into the field to drive efficiency and enable better workforce communications among workers who need a bigger screen, more computing capacity, or "handwritten" data input capabilities to be productive.

When investing in new mobility solutions for these cases, it may be tempting to consider consumer-grade tablets, laptops or 2-in-1s because they are often right in front of us. In addition, both decision makers and end users are typically more familiar with these devices, seeming to promise a quicker and more intuitive onboarding process. However, today's top enterprise-grade tablets either run the Android™ operating system (OS) or the same professional grade Windows 10 OS used on desktops and laptops, offering a similar user experience that can be just as simple – and even more rewarding in the long run – to introduce into the company's workflows.

For example, bringing together the mobility of a smartphone with the larger screen and the advanced processing power of a desktop or laptop computer, tablets enable highly mobile workers to access the data, native apps and other enterprise systems they need just as easily as if they were sitting at a desk. They can also connect with their colleagues to collaborate in real time via push-to-talk voice apps and augmented reality tools that allow for remote assistance by specialists. To illustrate: in a study of field service industry leaders, 35% prioritize mobile devices to enable faster response times to unexpected events, such as system outages or emergency incidents, while 34% invest in mobility for improved communications.

Zebra RS2100 Bluetooth Wearable Scanner

The World's Smallest and Lightest Enterprise Wearable Scanner

Give your workers an instant productivity boost with the RS2100 Wearable Scanner — the lightest and smallest enterprise wearable scanner on the market. Your workers will want to wear the RS2100, thanks to its innovative back of hand design that delivers a new level of comfort and dexterity. The unique mount leaves the palm entirely unobstructed, providing complete freedom to handle items. The very low profile enables easy picking in tight spaces. And there's nothing complicated about this wearable scanner: it's simple to purchase, deploy, wear and manage.

WHY ZEBRA CERTIFIED SUPPLIES?

Zebra not only provides high-quality, consistent Supplies to ensure your customer's satisfaction, but sales tools and resources to help you position and close opportunities, unlike many other label convertors

Inventory Management Solutions

For customers, managing their custom label inventory can be a headache; running out of labels can be expensive. Because requirements vary, Zebra offers three different inventory management solutions that you can leverage to ensure your customers never run out of labels. From the simplicity of a blanket order to the power of our Supplies Management Program, we have a solution to help your business save money and run more efficiently.

Printhead Protection Program

To enable you to provide additional value to customers who exclusively use Zebra Certified Supplies in their Zebra printers, Zebra offers free printhead replacements. Signing up is easy – there are no minimum purchase requirements. Printhead replacement requests are simple.

ZEBRA HONORED WITH 2022 MANUFACTURING LEADERSHIP COUNCIL AWARD

Company honored for driving the adoption of Industry 4.0 with its manufacturing suppliers globally

LINCOLNSHIRE, Ill. – April 4, 2022 – Zebra Technologies Corporation (NASDAQ: ZBRA), an innovator at the front line of business with solutions and partners that deliver a performance edge, today announced it has been recognized as a winner in the 2022 Manufacturing Leadership Council Awards for its outstanding achievement in the category of Enterprise Integration and Technology. Zebra was honored for leading the adoption of Industry 4.0 with its manufacturing suppliers globally. Industry 4.0, also known as the Fourth Industrial Revolution, aims to create a smart and agile value chain operation from the start of the product concept to the end of its life.

The Zebra Supply Chain Technical Operations team embarked on being an early adopter of Industry 4.0 to improve competitiveness and rapid response to customers and markets, spearheading a futuristic, digitized vision of manufacturing to drive efficiency. Through the deployment of innovative manufacturing process solutions, increased real-time data capture, visibility, reporting, and predictive and prescriptive analytics, Zebra helps enable its manufacturing suppliers to increase the efficiency of their operations by being more automated, digitally connected, intelligent, flexible and sustainable.

Zebra also helps manufacturers of all sizes around the world advance their adoption of Industry 4.0 within their own production and distribution networks. Some of Zebra's solutions driving this advancement include machine vision and fixed industrial scanning, autonomous mobile robots (AMRs), RFID, real-time locationing, as well as temperature monitoring and sensing among many others.

BATTERY MAINTENANCE SERVICE

Enhance your Zebra OneCare™ plan with battery protection

Benefits

Higher device availability
Protect worker productivity

Lower costs
Reduce the size of your spare battery pool; reduce resource time and cost associated with battery spare pool management; eliminate battery disposal requirements

Predictability
Eliminate unplanned battery replacement costs

One source simplicity
Trust Zebra to support your whole device, from the inside out

Your workforce counts on their mobile computers and printers to get their job done. And these devices depend on the batteries that power them. When batteries aren't working at peak performance, neither are your devices and your employees. What happens when a battery fails
mid-shift? A field worker can't execute a transaction; a retail associate can't print a receipt; a home health worker can't access a patient's records; and a direct store delivery driver can't process an invoice. It can cost your company over 80 minutes of lost mobile worker productivity each time a
battery doesn't last a full shift. And the same study found battery failures to be one of the leading causes for mobile device failure.

Take the worry out of battery performance with Zebra's Battery Maintenance service. With this addon enhancement to any Zebra OneCare plan, you're entitled to a new battery when your existing battery can no longer hold a full charge to power an entire shift. A choice of coverage levels lets you choose a plan that's just right for your business. And this end-to-end service even includes disposal of your old battery.

With Zebra's Device Diagnostics tool, a downloadable on-device tool for Zebra mobile computers, you'll always know when the batteries in your Zebra mobile devices need replacing. With the quick press of a button on your mobile computers, you can see if your batteries are healthy or need replacing—before batteries fail. Now, the size and cost of the battery pool is reduced. Operations run smoothly—no disruptions due to battery issues. Battery management time and cost is practically eliminated. And everything becomes predictable—from battery power and device uptime to costs and workforce productivity

ZEBRA ONECARE™ MAINTENANCE

Technology Is Complex. Maintenance Doesn't Have to Be

You count on devices and software applications to run your business and meet your customers' expectations—so unexpected surprises that halt your workflows or your operational outcomes are out of the question. You need a plan in place to safeguard against failures. One that maintains your hardware and software to extend the life of your devices, and keeps your operations running smoothly.

But how? Maximizing technology uptime is complicated with today's sophisticated devices—but it doesn't have to be with Zebra OneCare maintenance plans.

Go beyond the warranty with top-to-bottom, inside-out preventative care for your devices and the workflows they empower. Choose a "right-for-you" maintenance plan that's tailored to your business and its exact needs.

Accountability

From expert device repairs, software and security support, to top notch technical support, we're committed to the long-term performance of all of our solutions

Predictability

Bring operational certainty within reach when you move from reactive to proactive maintenance and ongoing support with defined service levels.

Peace of Mind

Get the benefits of maintenance without the burden.

Flexibility

Pick the maintenance and support plan that's right for you,right for your device, your budget, and right for your business.
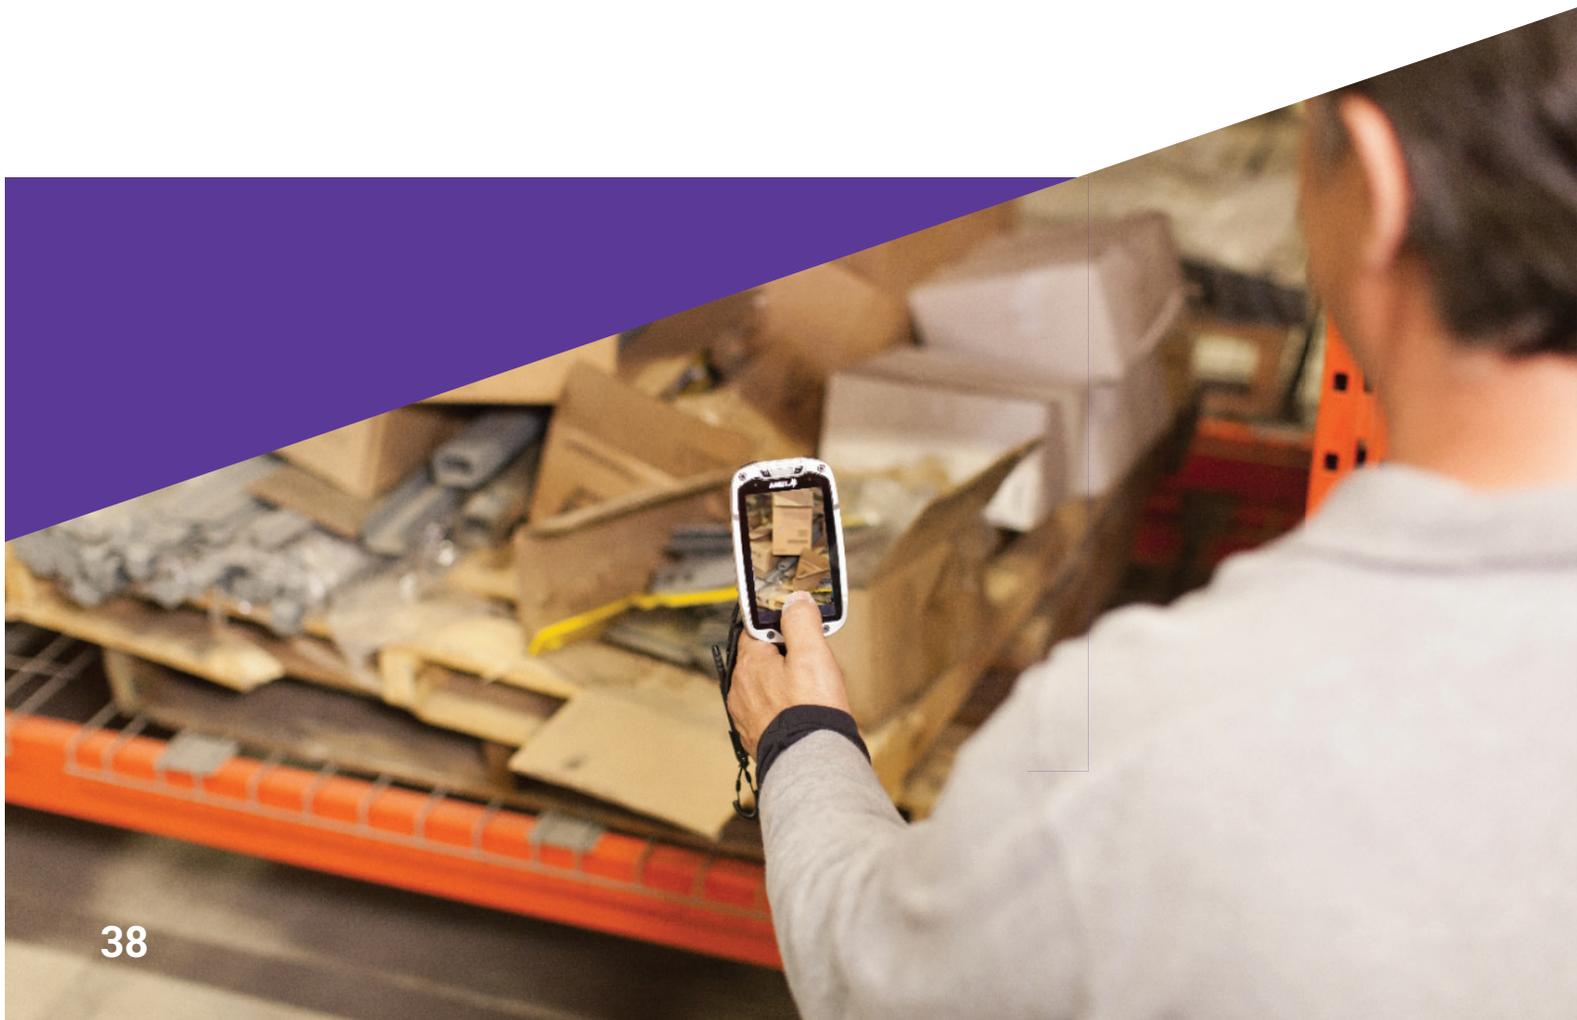

ZEBRA WINS 2021 SUSTAINABILITY AWARD

Program awarded as a top Sustainability Service of the Year

LINCOLNSHIRE, Ill. – Sept. 8, 2021 – Zebra Technologies Corporation (NASDAQ: ZBRA), an innovator at the front line of business with solutions and partners that deliver a performance edge, today announced the Zebra Circular Economy Program was recognized with a Sustainability Service of the Year award by the Business Intelligence Group. The 2021 Sustainability Awards program honors people, teams and organizations that have made sustainability an integral part of business practices or overall mission.

The **Zebra Circular Economy Program** promotes sustainability and reduces the environmental impact of standard product lifecycles in the supply chains of both Zebra and its customers. It is comprised of the Zebra Device Buy-Back Program, Zebra Certified Refurbished Device Sales and Rental Programs, and Zebra Recycling Services. These initiatives offer a more economical and environmentally beneficial option for businesses challenged with seasonal surges or the need to extend the lifecycle and expand their fleet of deployed Zebra devices.

"As we continue to help our customers operate more responsibly, we are honored to be recognized for our commitment to reducing waste and extending product life through our Circular Economy Program," said Jenna Stanley, Senior Vice President, Services & Customer Success, Zebra Technologies. "We will continue to invest in innovation that's a win-win for our customers and the environment."
