Footprint® WMS for Life Sciences

Get your warehouse down to a science.

Trust the WMS that is backed by 45 years of pressure testing.

Safeguard product integrity, patient health and your reputation using Footprint WMS, developed for the intricacies of handling and storing life science goods. Ensure regulatory compliance with workflow-driven processes, nested serialization and aggregation. Manage lot controlled and serialized life sciences inventory efficiently. View all your inventory globally across your enterprise and third-party facilities and balance inventory levels. Achieve supply chain end-to-end visibility to enable proactive decision-making and risk management.

Automate regulatory compliance

Ensure continuous compliance using workflow-driven processes and real-time data.

Detailed track and trace for product recalls and compliance

Ensure accurate tracking of lot and serialized products in drilldown detail.

Integrate faster and easier

Choose from pre-built and native integrations and connect seamlessly.

Overview of Capabilities

Quality Control

Document damaged goods with automated tracking and photos to prevent unwarranted claims and ensure accuracy. Inspect, hold, and quarantine goods using workflow-driven processes.

Automate Regulatory Compliance

Comply with established SOPs and regulations by automating processes. Leverage our comprehensive, immutable audit trail for accurate, real-time data collection and documentation of operations.

Track & Trace

Track every step of a product's journey in real-time, from production to delivery. Manage product recalls accurately and in a timely manner.

Labor Optimization

Tailor your user interface by role to improve focus and accuracy. Use workflow-driven processes to plan, schedule and monitor labor resources. Generate reports to gain insight for training and motivation.

Data Management

Simplify integrations; automate processes; removes bottlenecks and blind spots. Capture data via IoT, including environmental conditions of product to ensure product safety. Rely on nested serialization with aggregation.

Inventory Management

Accurate inventory tracking with centralized data and automated processes. Gain global view of inventory in real-time across your enterprise and third party facilities.

Who We Are

Datex is a warehouse management SaaS firm that serves operators in tightly controlled third-party logistics, food and beverage, life sciences and industrial industry segments.

Driven to make warehouse operations and growth as easy as possible, Datex is best known for its Footprint WMS platform: an intuitive, integrated cloud solution tailored to logistics providers and built to scale. Founded in 1978 and based in Florida, Datex today serves over 200 clients across the United States and other global markets.
