**Powering Compliance, Efficiency,
and Cold Chain Integrity
for Pharma Distributors, 3PLs,
and Manufacturers**

Engineered for Pharma

Automated and configurable for compliance with DSCSA, 21 CFR Part 11, cGMP, and other state, federal, and country regulations

Enable Effortless Regulatory Compliance and Audit Readiness

- Nested serialization; tracking aggregation/disaggregation events
- Automated processes to ensure accuracy and conformity
- Comprehensive immutable audit trail and seamless traceability
- Configurable, automated audit-ready reporting

Integrate to Emerging Technologies and Critical Systems

- Validated to your system requirements
- Connect seamlessly to Digital Supply & Traceability platforms
- Pre-built integrations to Lspedia and Tracelink
- Connect to AI/machine learning, IoT, robotics, flexible automation

Improve Performance with Advanced Inventory Control and Inventory Management

- Track by serial number, lot, component, vial, package, expiration date, location and more
- Integrated QA workflows, with multiple simultaneous holds; system alerts and notifications
- Real-time visibility and accuracy reduce out-of-stocks, mispicks, and slow turns
- Integration ready: state and federal government agencies, EHR pharmacy platforms, and more

"Part of the reason we could implement so quickly was the interaction between Datex and my group. Everybody at Datex was very engaging. If we had questions, they were quick to answer them, and the interactions were very good. In my experience, I've worked through WMS implementations in the past that were 12 to 18 months from start to finish. We were able to complete it fully within six months.

David Hamilton

Vice President of cGMP Warehousing, Tobin Scientific

Generate Labor Savings with Workflow Automation

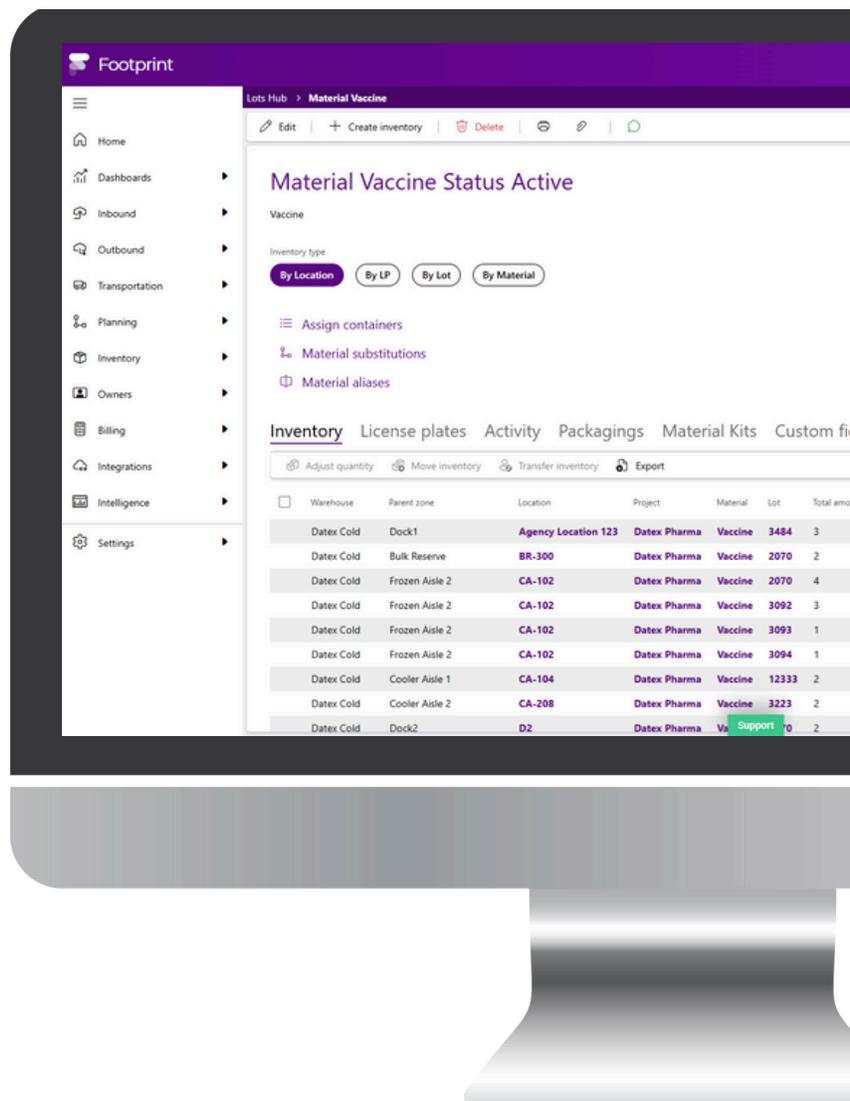

- Increase accuracy and streamline effort with intelligent task orchestration
- Task interleaving reduces travel time, boosting productivity
- Performance tracking by labor resource available for reviews and training
- Align smart workforce scheduling with demand or market fluctuations

Enable Cold Chain Management and Environmental Control

- Use with monitoring devices, including temperature/humidity sensors
- Programmable alerts and notifications to enable quick communication of status changes
- Enables selection of different temperature zones
- Document control process and full audit trail with reporting

Trust the WMS that is backed by 45 years of pressure testing.

Safeguard product integrity, patient health and your reputation using Footprint WMS, developed for the intricacies of handling and storing life science goods. Ensure regulatory compliance with workflow-driven processes, nested serialization and aggregation. Manage lot controlled and serialized life sciences inventory efficiently. View all your inventory globally across your enterprise and third-party facilities and balance inventory levels. Achieve supply chain end-to-end visibility to enable proactive decision making and risk management.

Award-Winning Modern WMS with Innovative Future-Forward Architecture

LCAP-based warehouse management system with composable architecture

Key Features of the Datex Platform Architecture

- ✓ Cloud-native, containerized architecture hosted in Azure
- ✓ Isolated environments for each customer to ensure full data, network, and compute separation
- ✓ Utilizes Azure SQL PaaS for transactional data with high-availability (HA) and disaster recovery (DR) configurations
- ✓ Read-only replicas for reporting and business intelligence (BI) performance
- ✓ Auto-tuning and auto-scaling of resources to handle dynamic demand
- ✓ SOC2 and HIPAA compliant for secure data handling and industry-standard compliance

The Datex Platform architecture ensures your warehouse management system is secure, scalable, and optimized for high performance, giving you the flexibility to grow and adapt with ease.

Who We Are

Datex is a warehouse management SaaS firm that serves operators in tightly controlled third-party logistics, food and beverage, life sciences and industrial industry segments.

Driven to make warehouse operations and growth as easy as possible, Datex is best known for its Footprint WMS platform: an intuitive, integrated cloud solution tailored to logistics providers and built to scale. Founded in 1978 and based in Florida, Datex today serves over 200 clients across the United States and other global markets.
